Training need assessment (MediLabSecure)

Dear Doctor,

In order to better define the training needs of your organisation in the framework of integrated surveillance of RVP, we kindly ask you to fill in the following questionnaire based on two parts:

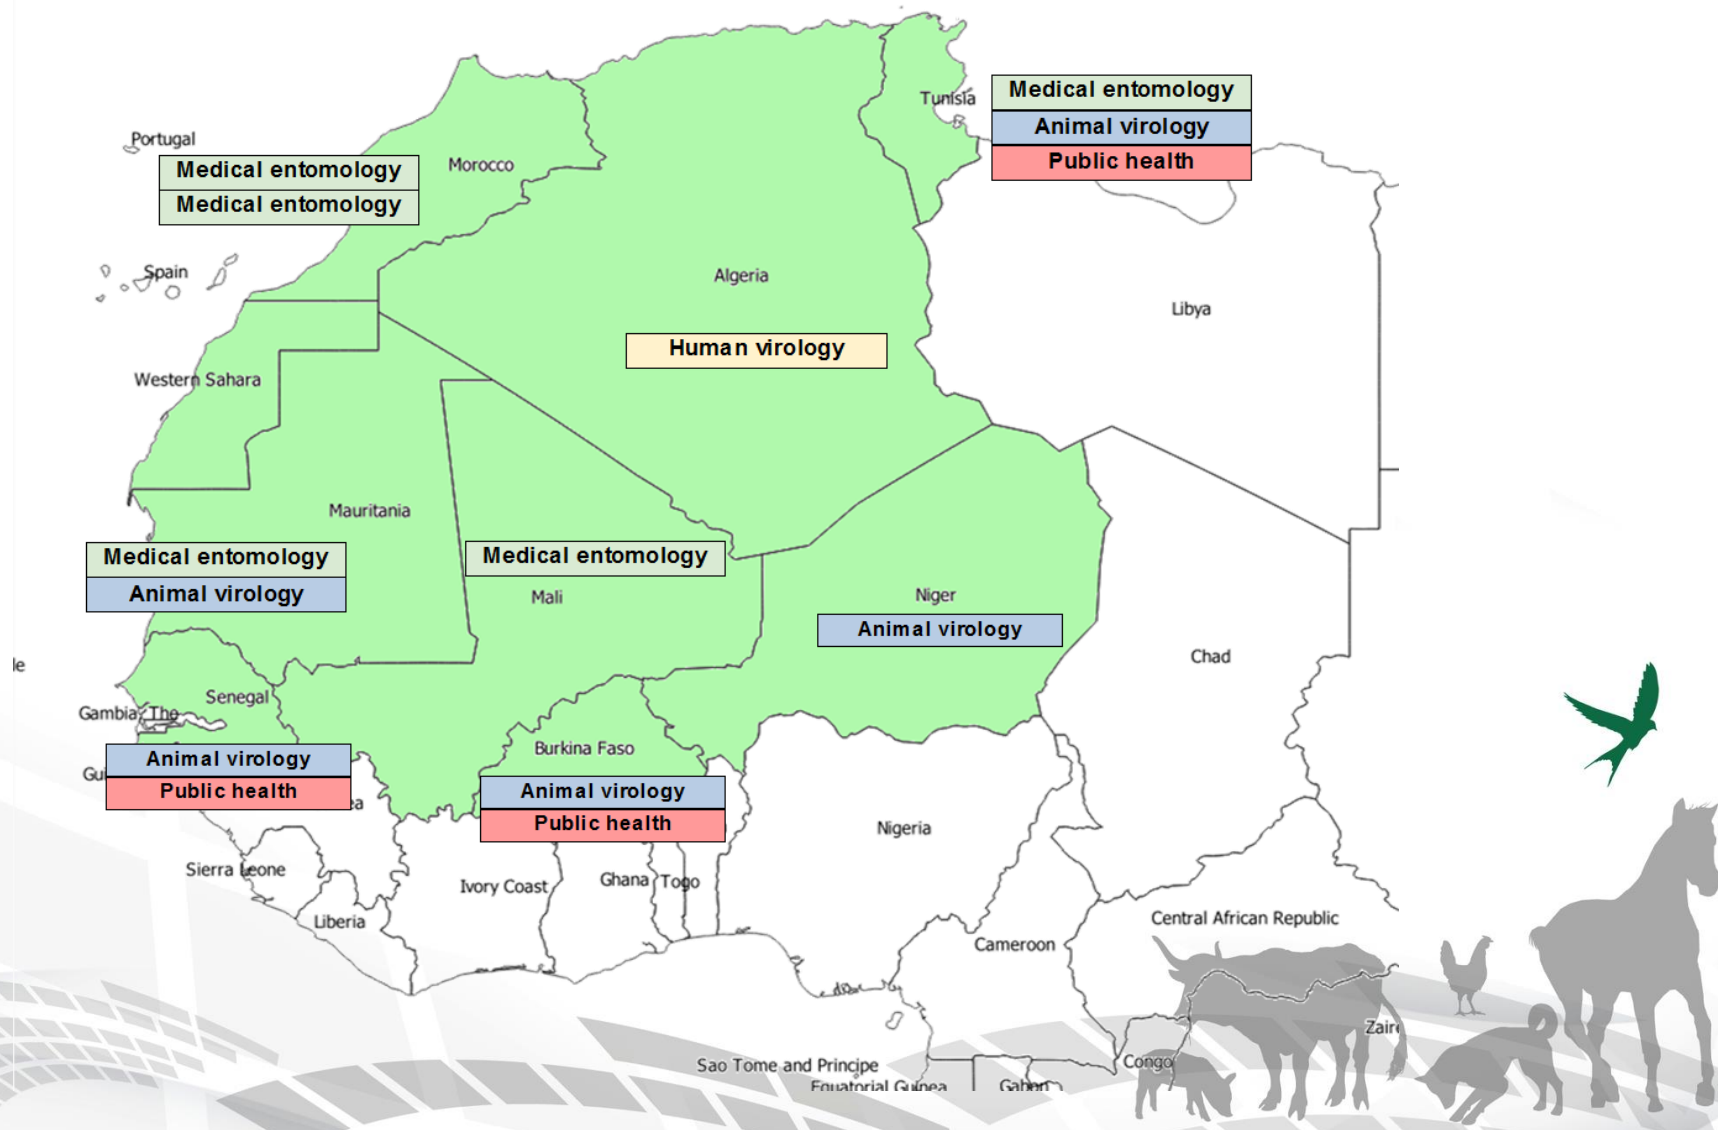

1. The first one proposed generic thematic questions related to the training system available in your Organisation.
2. The second part refers to the specific thematic areas of content for which you work.

OK

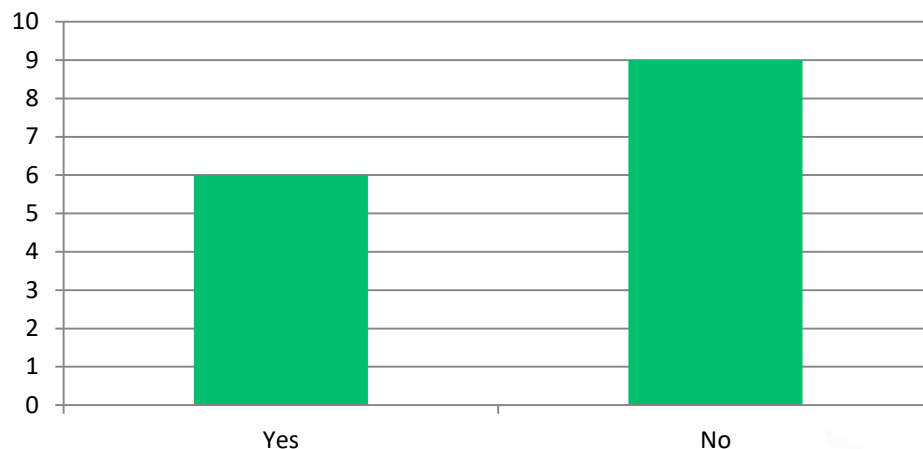

Training need assessment (TNA)

Responding sectors – 15 questionnaires

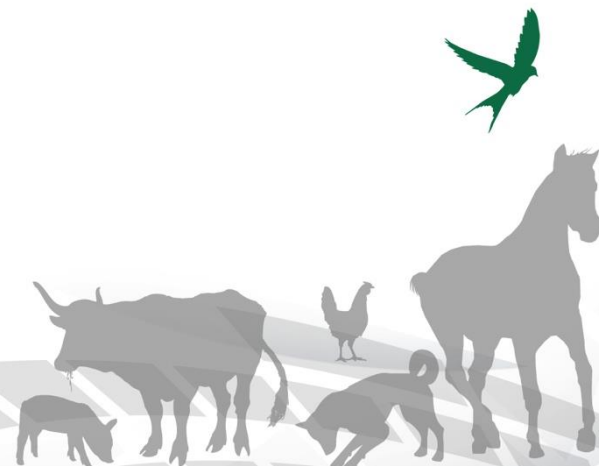

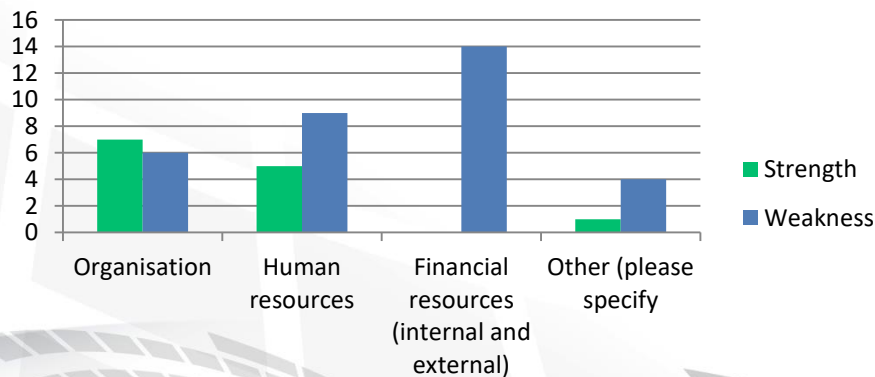

Training systems in place

Is there any official training system for the personnel within your Organisation?

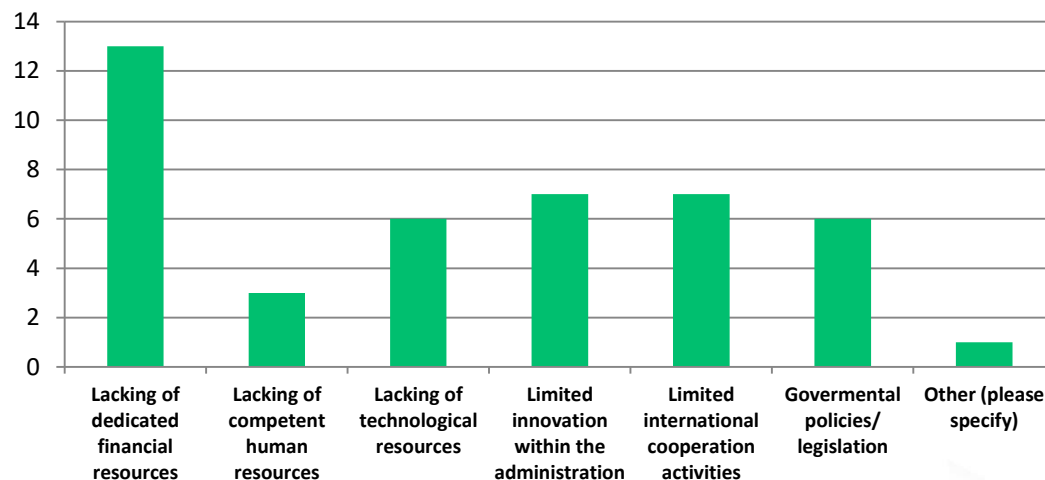

On your opinion, which are the principal strengths and weaknesses of the actual training system in terms of:

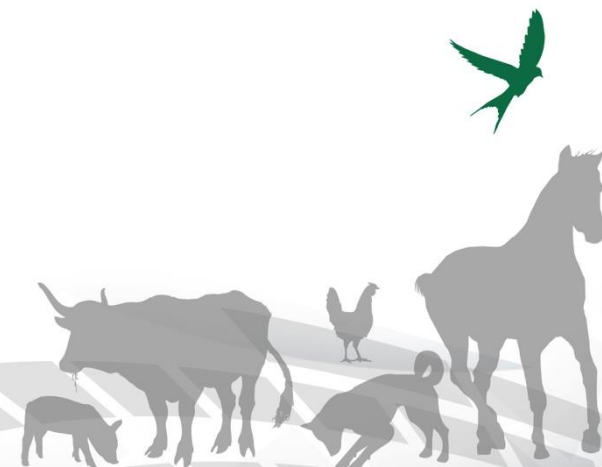

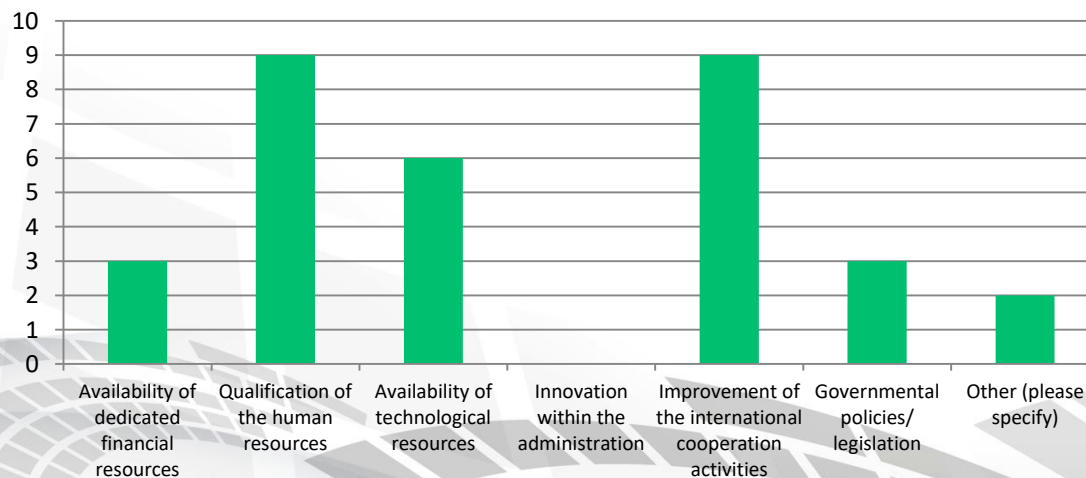

Training systems in place

On your opinion, which are the principal threats of the actual training system? Threats

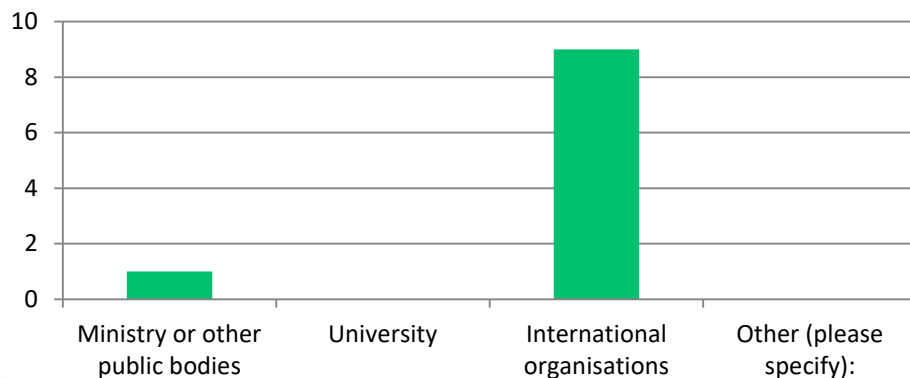

Which are the principal opportunities of the actual training system? Opportunities

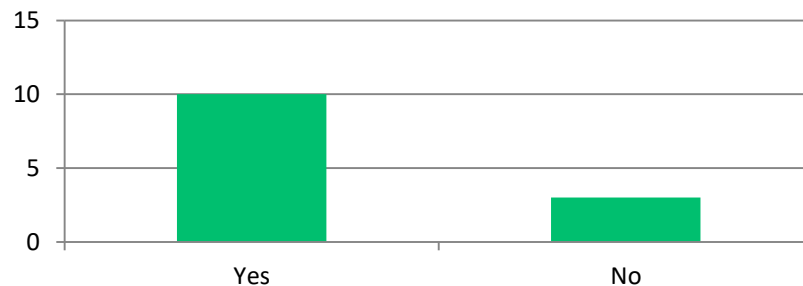

Training systems in place

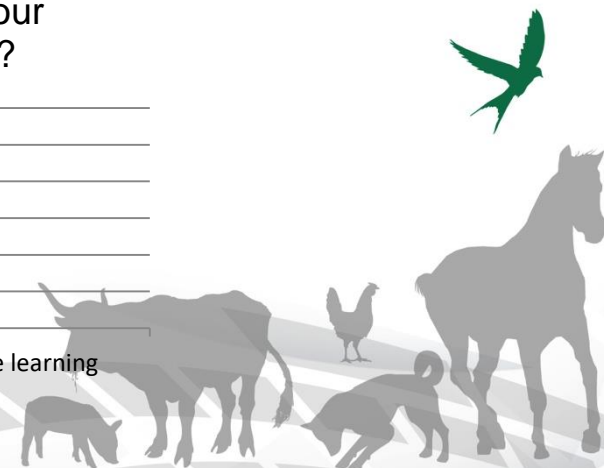

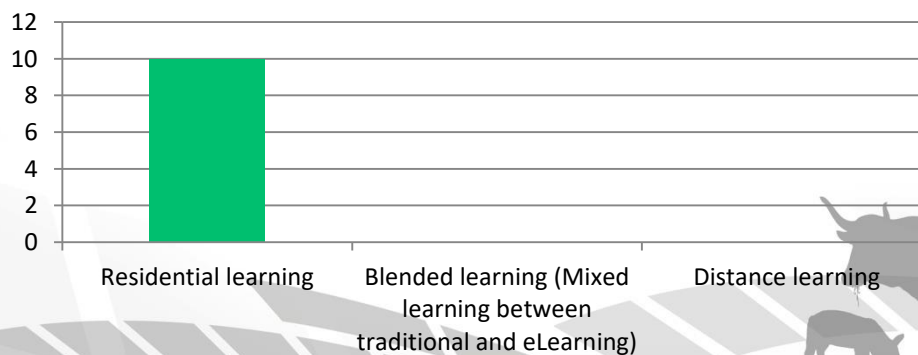

If answered yes to question #11, which is the main provider of the training activities delivered?
